1. Applicant's election without traverse of Group I, claims 9,10,13 in the reply filed on 8/1/06 is acknowledged.

2. Claims 1-8,11,12,14-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/1/06.

3. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because Non-initialed and/or non-dated alterations have been made to the oath or declaration (non-initial changes were made to Inventor Lemieux's PO address (zip code)). See 37 CFR 1.52(c).

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 9,10,13 are rejected under 35 U.S.C. 102(b) as being anticipated by Bourel et al. (EP 1059088 A1).

Bourel et al. disclose purified autoantibodies isolated from IVIg, wherein said autoantibodies bind soluble human serum proteins such as IgG (see abstract, claims 1-3, [0001], [0014]). Bourel et al. disclose a composition of said antibodies and a pharmaceutically acceptable carrier (see claim 20). The functional properties of said antibodies recited in the claims are an inherent property of autoantibodies which bind soluble human serum proteins. Said antibodies are capable of forming autoimmune complexes because they are antibodies which bind soluble proteins present in human serum. Said autoantibodies have the property of claim 10 because they are the same as the autoantibodies disclosed in the specification (antibodies which bind soluble human serum proteins).
